

MALAIKA TARIQ

Software Engineer | Full Stack Developer

+92 3379918720 | malaikatariq800@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Software Engineer with 1+ year of professional experience building production applications across fintech and full-stack web platforms. Experienced with Next.js, TypeScript, React, MERN, REST APIs, authentication, automated testing, and internationalized applications. Developed features for an AI-powered SME credit decisioning platform serving financial institutions across the UAE/GCC/MENA region. Strong foundation in data structures, algorithms, and full-stack development.

TECHNICAL SKILLS

Languages: C++, TypeScript, JavaScript

Frontend: React.js, Next.js, Redux Toolkit, MUI, Tailwind CSS

Backend: Node.js, NestJS, Express.js, REST APIs

Databases: MongoDB, MySQL, SQL Server

Tools: Git, GitHub, Docker, Postman, CI/CD, AWS

Testing: Automated Testing, Unit Testing

EXPERIENCE

Frontend Engineer | Zyada Credit

Sept 2025 – Present

- Developed production features for an AI-powered SME credit decisioning platform serving financial institutions across the UAE/GCC/MENA using Next.js, TypeScript, React, Redux Toolkit, and MUI/Tailwind CSS.
- Built company dashboards, financial statement interfaces, risk assessment workflows, KYC flows, eligibility interfaces, and administrative features.
- Integrated frontend workflows with REST APIs, handling authentication, validation, API state, file uploads, error handling, and backend workflows.
- Implemented Arabic/English internationalization with full RTL support and developed OTP-based authentication and protected application flows.
- Wrote automated tests and maintained technical documentation for features and workflows to improve reliability and maintainability.
- Collaborated directly with founders, backend engineers, and designers in a fast-paced startup environment to ship production features.

Full Stack Developer Intern | Ezitech

May – July 2025

- Developed and enhanced MERN-stack applications while collaborating directly with senior developers.
- Built and enhanced Admin, Manager, Public Profile, University, HR, and affiliate portals supporting student tracking, hiring, payments, certificates, and referral workflows.
- Implemented features including automated salary distribution, payment verification, candidate filtering, compliance alerts, and profile verification.

Open Source Contributions

Jan – April 2025

- Contributed to open-source projects on GitHub, gaining experience collaborating on shared codebases and following contribution workflows.

PROJECTS

EduConnect — Full-Stack Learning Platform

React | Node.js | Express | MongoDB | JWT

- Built a learning platform supporting course discovery, enrollment, progress tracking, and instructor course publishing.
- Implemented JWT authentication and role-based student/instructor flows.
- Designed lesson-level progress tracking and completion calculations.

CloudDrive — Google Drive Clone

React | Node.js | Express | MongoDB | JWT

- Built a cloud file-management application supporting file uploads, folders, sharing, and authenticated access.
- Developed REST APIs and responsive frontend workflows for file management.

EDUCATION

B.S. Computer Science | CGPA: 3.81/4.00 | **National University of Modern Languages**
